DONE

Decision panel

Safe to stop now: **Yes**

Required blocker: None

Optional next moves:

- Use tracker as boot dashboard in new chats
- Continue UI polish later
- Switch to classroom/product work

Active rule: Boot/start surfaces must point to the visual tracker before governed work resumes.

You are here

- Baseline MPP/CDR authority
- Bounded subprocess wrapper
- Atomic JSON writer
- Atomic append-log writer
- Visual tracker HTML renderer
- Boot-surface tracker binding
- Next user-selected work

Visual Presentation Quality Gate

Status: Bound to MPP, USS, HTML activity cartridge, and operator tracker surfaces.

Teacher professional presentation: The tracker must make classroom-facing and operator-facing work look credible, organized, and intentional rather than like raw debug output.

Visual proof: mobile-first layout, focus-visible states, reduced-motion support, and design-token checks are required before promotion.

Generated by `render_operator_visual_tracker_v2.py` from `OPERATOR_VISUAL_TRACKER_STATE_LATEST.json`.

Stage 17 · Audit Command Replay

Status: PASS · 9 audit commands replayed from the exported Stage 17 authority ZIP.

Command replays: 9

Replay issues: 0

Operator packet entries: 51

Operator packet ZIP:

METABLOOMS_OS_STAGE17_OPERATOR_AUDIT_PACKET_REPAIRED_20260502T192650Z.zip

Operator-only Audit Packet

This smaller packet contains the current command surface, audit packs, selected evidence, tracker, and replay proof so future chats can inspect audit evidence without using the full OS bundle.

METABLOOMS_OS_STAGE17_OPERATOR_AUDIT_PACKET_REPAIRED_20260502T192650Z.zip
